(a) The city hereby establishes two (2) separate accounts into which deposits shall be made for the accumulation of the equivalent future value of the city's grant from the state department of environmental regulation for state assistance under F.S. § 403.1838 (Step 2 + 3 Grants). The account shall be separated as follows:

- (1) Sewerage system capital improvement account--Source wastewater system impact fees.
- (2) Sewerage system capital improvement account--Other sources.

All impact fees collected hereunder shall be deposited in the account as set forth above and used only for the purpose of expanding the city's sewer system. Funds may be disbursed from this account only upon authorization by the city council upon determination by the city council that the proposed expenditure is for the expansion of the system within the intent and meaning of the law of this state. Notwithstanding this provision, revenues of impact fees may be pledged for borrowing for purposes of sewer system expansion in the same manner as any other source of revenue.

(b) Deposits to the sewerage system capital improvement account shall commence not later than the end of each one-year period beginning with the date of initiation of operation of the complete grant funded treatment works. Beneficial occupancy shall be deemed the date of initiation of operation of the complete grant funded treatment works. The number of annual deposits shall be twenty (20), which is the design life of the treatment works as calculated by the city's consulting engineers.

Deposits into the sewerage system capital improvement accounts shall be made annually, or, at the discretion of the city's finance director, more frequently. Deposits shall be made not later than on the last business day preceding the anniversary date of beneficial occupancy. The city does not have any plans at present for early termination of deposits into the sewerage system capital improvement accounts. The city may, however, make repayments into these funds upon the recommendation of the city's finance director and approval of the city manager. Deposits may be terminated once the sum of deposits equals the required annual deposit multiplied by the required number of annual deposits.

The sources of revenue for the required deposits shall be as follows:

- (1) Wastewater system development charges (to the extent permitted by law);
- (2) Current year surpluses from the revenue fund;
- (3) Prior year surpluses from the revenue fund;
- (4) Wastewater system user charges.

Deposits into the sewerage system capital improvement accounts shall be invested in accordance with the city's normal practice for investment of funds, but shall be accounted for separately.

The aggregate amount of the annual deposits into the sewerage system capital improvement accounts shall be determined by the following formula:

$$D = \frac{G \cdot i(1 + i)^{DL}}{(1 + i)^{DL} - 1}$$

(1 + i)^{DL} - 1

where:

TABLE INSET:

D	=	required annual deposit
G	=	grant amount actually received by city
i	=	0.078
DL	=	20 years

(c) Accrued monies in the sewerage system capital improvement accounts shall be expended for any permissible purpose including, but not limited to, the following:

- (1) Capacity expansion of any wastewater system facility;
- (2) Replacement of any wastewater system component which has reached the end of its design life;
- (3) Repair and/or replacement of treatment plant, pumping station or major transmission facilities in the event that these items are undertaken as part of capacity expansion or upgrade necessary to meet more stringent effluent limitations required by a regulatory agency or are necessitated as the result of man-made or natural disaster.

(d) The city shall engage a certified public accounting firm to prepare and submit annually to the state department of environmental regulation a certification that the revenue generation system has been maintained in accordance with Chapter 17-50, Florida Administrative Code.
